Dear Hiring Manager,

I hope you're doing well. I am writing to express my interest in the Product Manager position at Everyday Robots. I am currently a senior at Georgia Tech majoring in Computer Science. Over the past couple of years, I have been following Everyday Robots, and I had the opportunity to network with other product managers at the company. Their passion for autonomous robots was contagious, and with my past research experiences and interest in machine perception and robotics, I believe I would be a great fit for product roles at Everyday Robots.

This summer, I interned at Verkada, a series D startup in San Mateo, and I had the privilege of working closely with the product management team. This experience not only honed my technical skills but also ignited my passion for creating products. Over the summer, I was actively collaborating with my product manager and designer; I helped iterate through mockups of our UI and gained valuable insights into developing products quickly while considering client feedback. Verkada's environment, which fostered autonomy and ownership of projects, allowed me to thrive and showcase my ability to take full responsibility for a product. My internships at Instagram and Amazon further equipped me with a comprehensive understanding of realistic development timelines and the importance of effective team collaboration. I wish to bring these experiences to Everyday Robots.

Beyond my industry experiences, I have a proven track record of leadership and organizational skills. At Georgia Tech, I founded Bioinformatics @ GT and helped kickstart Supercomputing @ GT. I organized and hosted regular events, leading to substantial growth in both organizations. The ability to cultivate and manage communities of over 300 and 500 members, respectively while boasting strong meeting attendance and fostering industry and research connections.

What excites me most about the prospect of joining Everyday Robots is the opportunity to work on projects that are as close to the user as possible. I thrive on user and client feedback, utilizing it to iteratively develop and enhance products. Nonetheless, Everyday Robots's mission to use robotics to help the greater community resonates with me. As I connected with product managers at Everyday Robots, it was evident that they emphasized using robotics for social good. From aiding with recycling efforts to assisting senior citizens, I was captivated by the enthusiasm shared amongst all product managers in altruism—a refreshing digression from many other Silicon Valley moonshots—and at Everyday Robots, I hope to continue this legacy.

I sincerely appreciate the consideration for the product management role at Everyday Robots. I believe my experiences in engineering, operations, and management underscore my abilities, and I look forward to hearing from you soon.

Kindest Regards,
Rohit Vemuri
